Nasim Farach, Regional Monitoring and Evaluation Advisor, CDC Central America Region: CDC supported the development of a behavioral surveillance survey. The findings basically showed that key populations had a prevalence upwards to 10 times the general population prevalence, however there was no specific prevention package tailored for this population.

Dr. Gabriela Maria Cano Pineda, Alonso Suazo HIV Care and Treatment Clinic: In one month, I see about 18 per day. There are about 200, maybe 230, 220 per month. It affects us all.

Vania Vallencillo, Laboratory Advisor, Universidad Del Valle de Guatemala: We need to give technical assistance help to get better implements strategies to control HIV.

Farach: The Ministry of Health in Honduras started to provide a tailored HIV combination prevention package for key populations, which is now across the country.

Cano Pineda: People need more education, medication and diagnosis.
